**The Team at Street & Performance helps make you
FIRST AGAIN - Ram-Port Fuel Injection**

See Pricing below for other Option's shown in picture

S&P RAM-PORT INJECTION

Street & Performance S/B Ram-Port Fuel Injection was designed for the new **Fast Burn Aluminum & Vortec Cast Iron Heads**, both new for 2000. Street & Performance has adapted the technology from their Famous BBC and SBC Multi-Port Fuel Injections. With the same design characteristics as the Multi-Port unit, the Ram-Port maximizes the performance characteristics of the newly

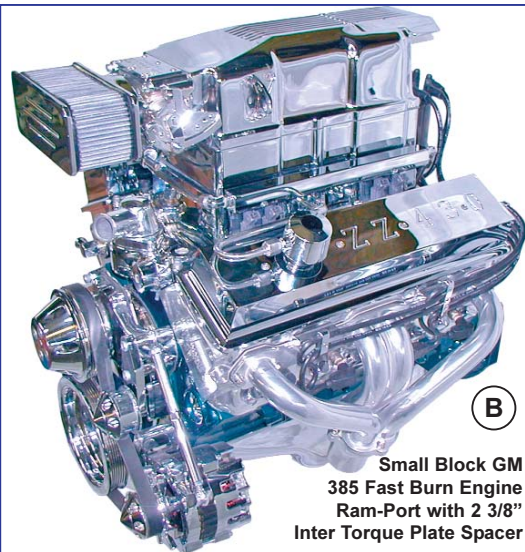

designed heads. The new heads work great on 283's/305's/327's, ZZ-4, 350's, 383's, & 406 Engines.

The new Ram-Port is lower profile than its sister injection the S&P Multi-Port. Using the new LS-1 24.9# Injectors, this compact design allows the Ram-Port unit to be added to Monty's, Chevelle's, Camaro's, El Camino's, S-10's, Jeeps and other vehicles using the new design heads.

The Ram-Port Unit comes complete w/harness, 1227730 GM Computer, Fuel Pump Relay, MAP Sensor, Check Engine Light, ALDI Diagnostic Link, Oil Pressure Back-up System, Manual Fuel Pressure Gauge.

Each Harness and Unit is Custom Designed for you specific application.

Additional Options Available w/ the Ram-Port Injection Units Available Natural, Show Polished or Chrome
